

Navy WEB SDR System

CURRENT SYSTEM--AUTORODS

- Incoming RODs RR01A
- Outgoing RODs RR01B
- SIT RODs RR01C
- Limited to use by UADPS activities (FISCs, FISC partners, co-located DDs)
- Runs on Tandem hardware and legacy databases

Navy WEB SDR System

Initiatives contributing to creation of Navy Web SDR System:

- SIT Re-engineering project
- Tandem Rehost project
- MFCS Retail project
- MIT Tracking automation project

Navy WEB SDR System

Included in Navy's Web SDR System will be:

- Incoming SDRs
- Outgoing SDRs
- SIT SDRs
- MIT SDRs
- TDRs for Intransit resolution
- FLIPL forms for lost intransit material
- Metrics and online reports

Navy WEB SDR System

Incoming SDRs

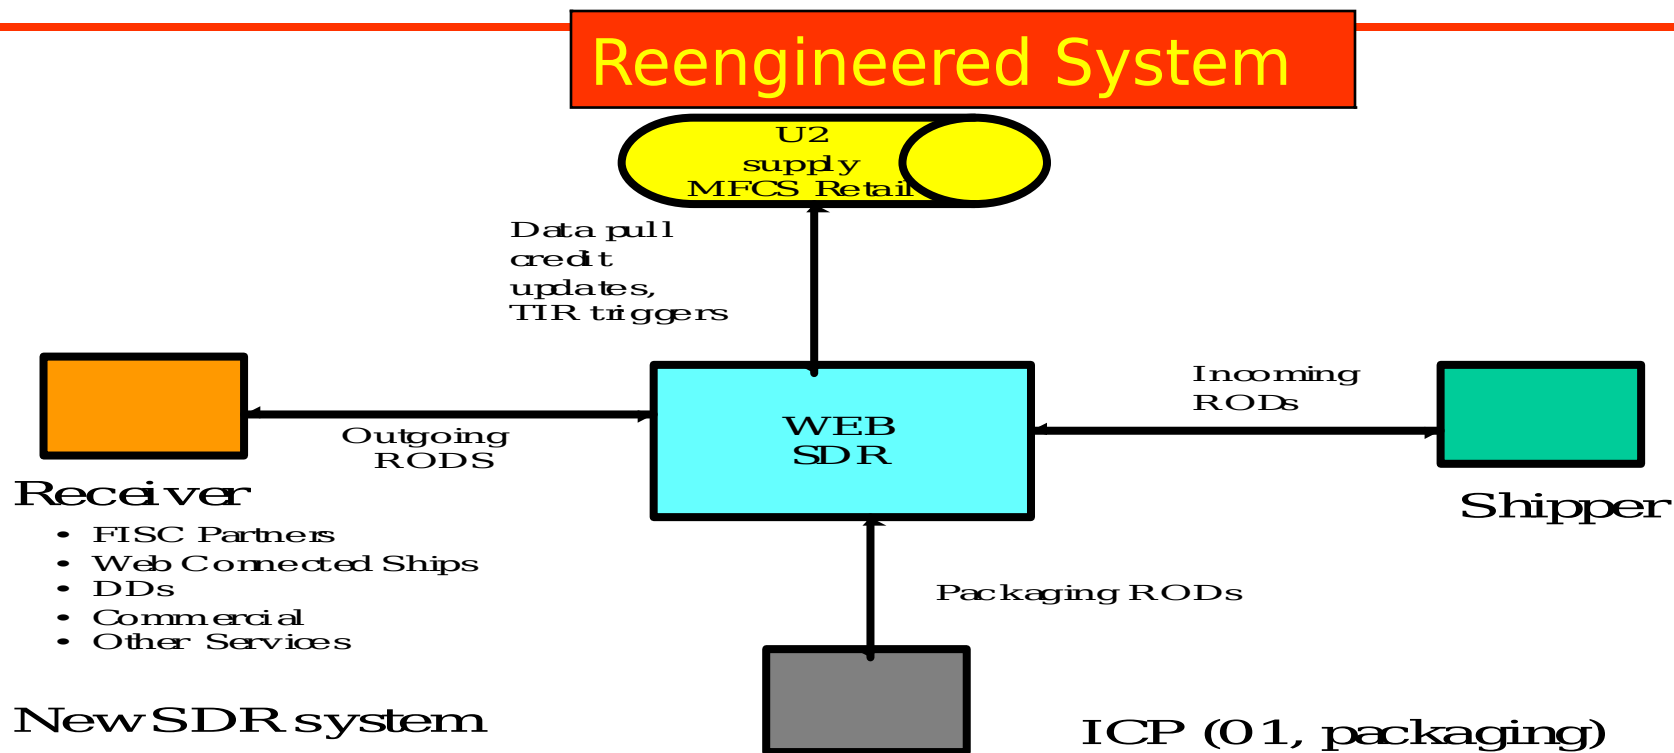

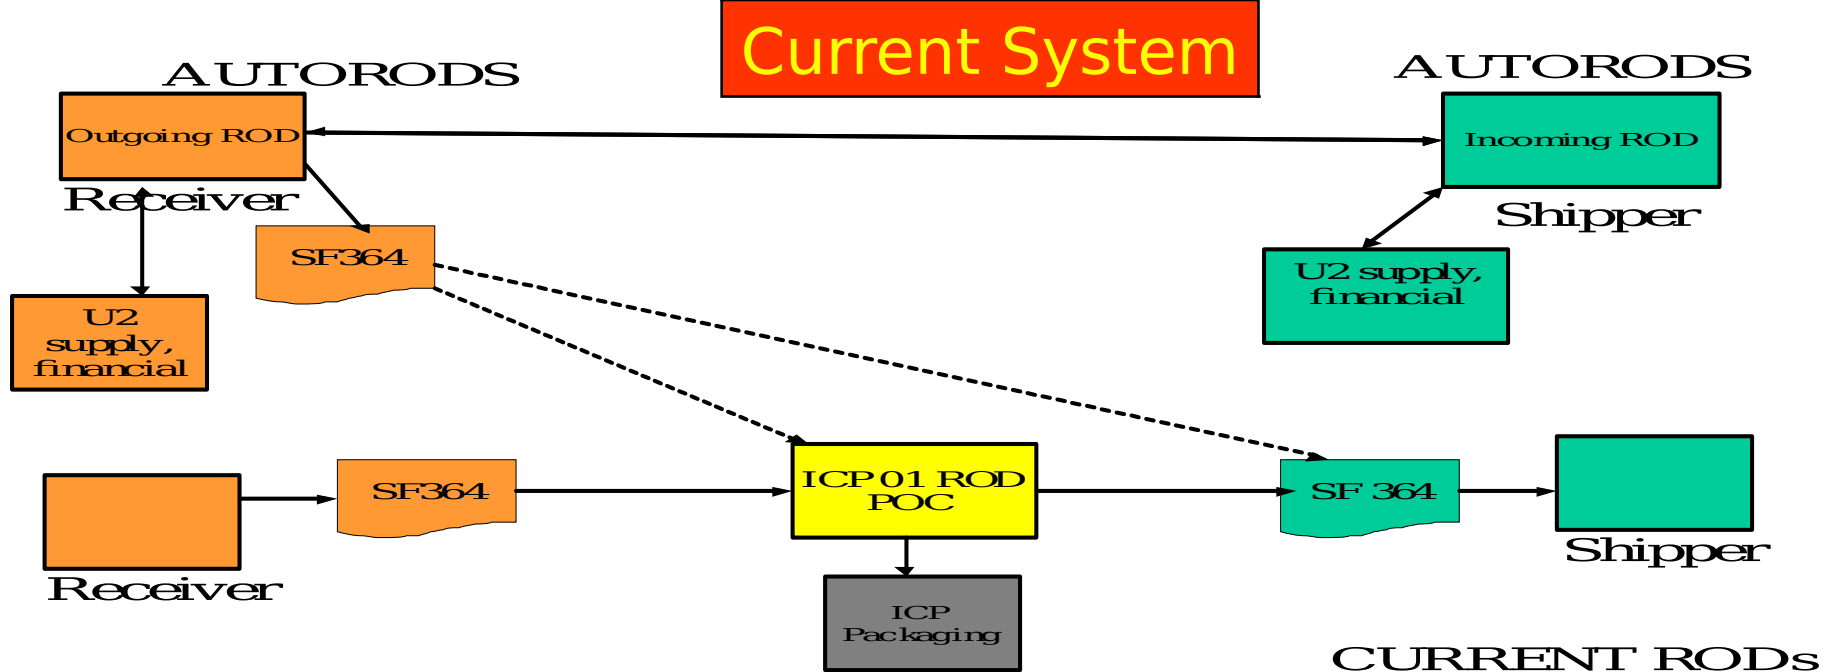

- Receipt discrepancies identified to shipper
- Request for credit
- Provide Status
- Create Physical Inventory Requests
- Followup on overdue SDR responses
- Alert FISC/DD to Warehouse problem areas: shelf life, damage, labelling
- Reports for Inventory Analysis

Navy WEB SDR System

Outgoing SDRs

- Wrong item received
- Wrong quantity received
- Damaged, expired shelf-life material received
- Followup for Credit
- Non-receipt of material ordered
- Packaging discrepancies

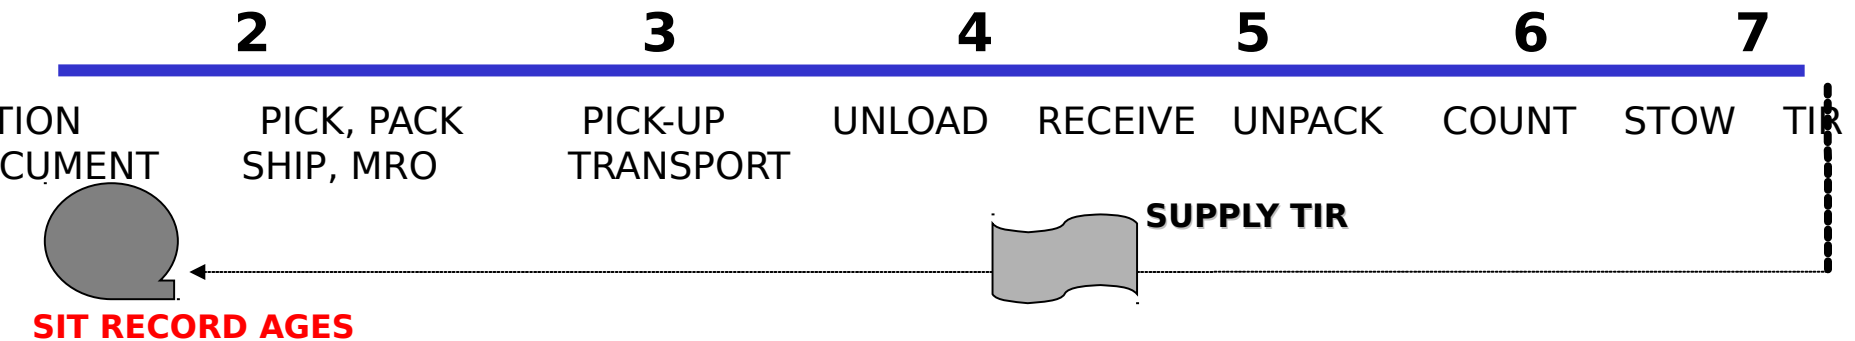

Navy WEB SDR System

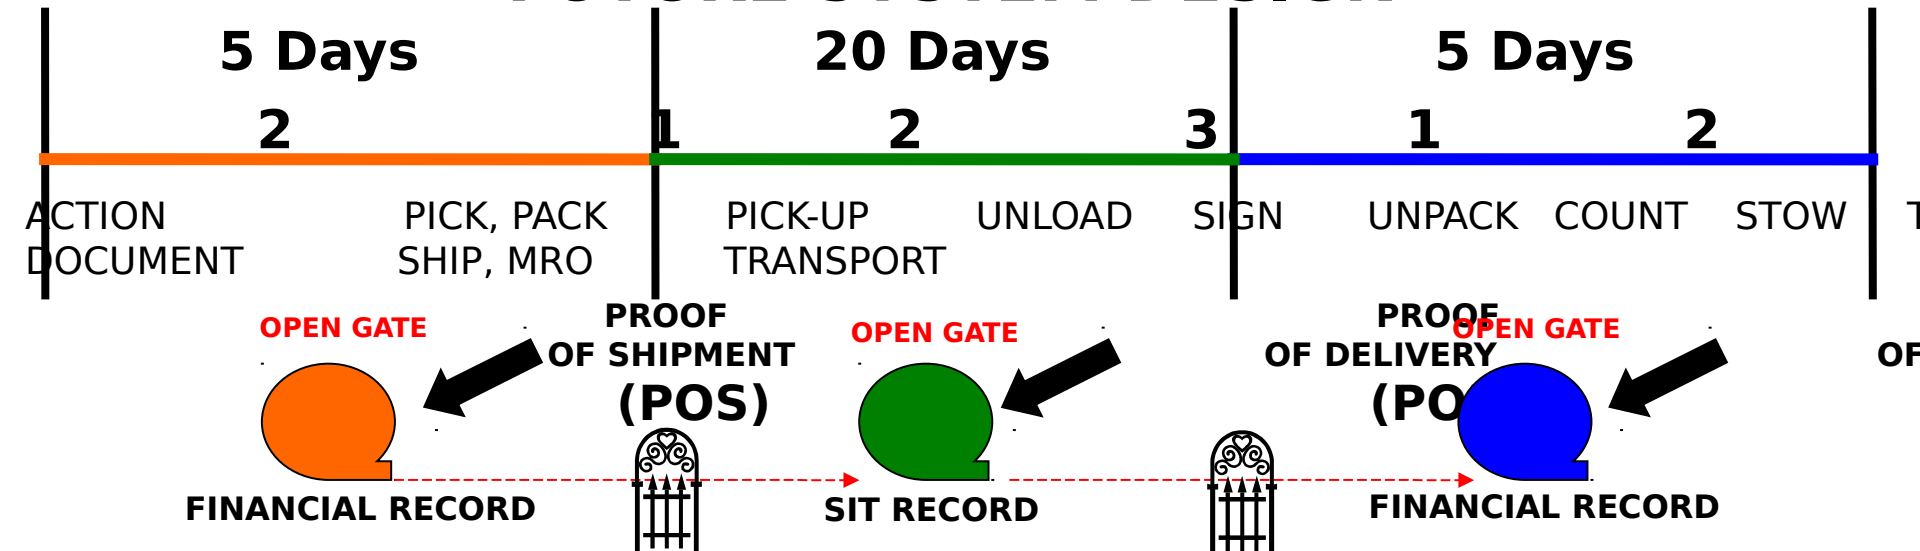

Stock In Transit (SIT)SDRs

- SIT is movement of Navy-owned stock from DD storage to repair, repair back to DD storage, from DD storage to Navy activity stock
- SIT SDRs used to obtain Proof of Shipment Data from issuing activity
- SIT SDRs used to obtain confirmation and TIR of receipt from receiving activity
- Expands use of SIT SDRs to commercial, non-Navy, non-UADPS activities--to anyone with Web Access/PKI certification

SIT Steps...Today = 45-540 Days

FUTURE SYSTEM DESIGN

Navy WEB SDR System

Material In Transit SDRs:

- Material In Transit is newly purchased material moving from DLA/GSA or vendor custody to stockage as Navy-owned material
- MIT SDRs will be used to obtain Proof of Shipment from Vendor or DCMAO
- MIT SDRs will be used to obtain D4-TIR confirming receipt from DD/Navy activity

Navy WEB SDR System

Intransit Web Transportation Discrepancy Reports

- RFI TDRs sent to shipping carriers, Transportation Officers, ATAC
- Proof of Delivery (POD) to consignee required to resolve Stock In Transit, Material In Transit
- If unable to obtain through automated file scans, Navy tracking programs generate RFI TDRs
- If unable to obtain POD at all, Navy tracking programs generate Claim TDRs, notify MTMC.
- Long term goal--connection to MTMC TDR website

Navy WEB SDR System

Financial Liability Investigation for Property Loss (FLIPL)

- For resolution of MIT and SIT
- Loss of Classified material by issuer or receiver
- Web SDR system will provide online DD 200 form for custodial activity to complete at same time as loss TIRs sent to ICP

Navy WEB SDR System Requirements

- Netscape 4.5 or higher
- Internet Connectivity (minimum 33.3kps speed)
- Local Laser Printer (Reports will be printed on 8.5" x 11" paper in a Landscape mode.)
- Acrobat Reader (Downloadable from SDRS web site)
- 800x600 Screen Resolution
- E-mail
- URL
- Login ID & password
- PKI Certificate (eventually)
